

U = U

**UNDETECTABLE
viral load means HIV IS
UNTRANSMITTABLE**

*** Undetectable = Untransmittable**

* Undetectable = Untransmittable

Effective HIV treatment (ART) lets people lead healthy active lives and also protects their partners.

When viral load is undetectable on ART, HIV is no longer sexually transmitted - with or without condoms.

The evidence for this comes from many studies, including PARTNER and PARTNER 2.

Doctors, nurses and other health workers at the Kobler Centre support the evidence that U=U *.

We were proud to be involved in the PARTNER studies.
